PROFESSIONAL SUMMARY

Detail-oriented and analytical BSc IT graduate (Computer Science & Informatics, University of Johannesburg). Highly proficient in data management, database systems, statistical information processing, and administration support. Experienced in extracting, capturing, and maintaining accurate data across multiple platforms and systems. Strong numerical, organisational, and communication skills with a proven ability to manage information with precision and integrity. Committed to accuracy, ethical conduct, and delivering reliable results in a structured professional environment.

TECHNICAL SKILLS

- Data Capturing & Statistical Information Management
- SQL & MySQL — Database Querying & Extraction
- MS Office Suite — Excel, Word, Outlook
- Numerical & Analytical Skills
- Records Management & Administration Support
- Organisational & Co-ordination Skills
- Written & Verbal Communication
- Attention to Detail & Accuracy
- Logical & Objective Problem-Solving
- Interpersonal & Stakeholder Liaison Skills
- Creativity & Innovation
- Integrity & Ethical Conduct

KEY PROJECTS

CarBook – Multi-Platform Car Rental System | Jul 2025 – Oct 2025

Tech Stack: Flutter (Mobile), Node.js, MySQL, JavaScript (Web)

- Independently architected and built a full-stack car rental application across mobile and web platforms from concept to deployment.
- Implemented real-time data syncing, booking management workflows, and vehicle listing features — demonstrating cross-platform scalability.
- Wrote clean, maintainable code across Node.js backend and Flutter mobile frontend with MySQL for persistent data management.

Guardian Eye – GBV Reporting System (Final Year) | Feb 2024 – Oct 2024

Tech Stack: ASP.NET, MVC Core, .NET MAUI (Mobile)

- Collaborated in an agile team to design and build a secure GBV reporting platform supporting web and mobile interfaces.

- Developed responsive, user-friendly interfaces and integrated them with backend authentication, case tracking, and reporting services.
- Delivered enterprise-grade features including secure user authentication and role-based case management.

Vite Clothing Website (Second Year Group Project) | *Jul 2023 – Oct 2023*

Tech Stack: ASP.NET Web App, WCF Service

- Contributed to UI design and frontend-backend integration for an e-commerce platform, supporting product display and interaction flows.
- Gained hands-on experience integrating WCF service layer with ASP.NET web application in a collaborative team environment.

EXPERIENCE

Developer — Innovative for Health Hackathon | **Moshal Program** | *Oct 2024 – Nov 2024*

- Designed and rapidly prototyped a tech-driven healthcare innovation solution within a competitive, time-pressured team environment.
- Demonstrated agile collaboration, solution pitching, and iterative development — delivering a working prototype within the hackathon timeline.
- Applied problem-solving skills to translate a real-world healthcare challenge into a functional digital solution.

EDUCATION

BSc IT: Computer Science & Informatics | **University of Johannesburg** | *Feb 2022 – Nov 2025*

- Coursework: Software Development, Data Structures & Algorithms, Databases, Mobile & Web Application Development, Computer Networking, Assembly Language, Visual Programming.

National Senior Certificate | **Adams College** | *2017 – 2021*

Aggregate: 81% | 3 Distinctions | No subject below 75

- Achieved strong academic results across diverse subjects, demonstrating adaptability and a strong aptitude for learning.

CERTIFICATIONS & AWARDS

✓ **SAP Young Professionals Program** — SAP, Start date –Jun 2026

✓ **Digital Revolution** — MinnaLearn, Apr 2026

✓ **Emerging Technologies** — MinnaLearn, Apr 2026

✓ **Elements of AI** — MinnaLearn, 2025

✓ **Cybersecurity Fundamentals** — MinnaLearn, 2025

✓ **Intro to CSS** — CuddyTeam, 2024

✓ **AI in the 4IR** — University of Johannesburg, 2022

UJenius Top 1% Award — University of Johannesburg, 2022

Moshal Scholar — Moshal Program

COMPETENCIES

- Agile teamwork & cross-functional collaboration
- Self-directed learning & continuous improvement
- Analytical problem-solving & creative thinking
- Multi-project time management
- Clear technical & client communication
- Attention to detail & quality assurance
